Make world-class façades come to life

**APARNA CRAFT**

Christchurch Art Gallery  
Christchurch, New Zealand.

Aparna-Craft redefines what is possible in the design and engineering of façades by combining cutting-edge technologies and innovative construction materials, changing the face of city skylines across the country.

Aparna-Craft employs new techniques of fabrication and new engineering ideas that add a totally new dimension to form and function of a façade.

Mactan Cebu International Airport  
Cebu, Philippines

Warship Pavilion  
New South Wales, Australia

Through its projects in India, Aparna-Craft will bring to life awe-inspiring façades and spaces by stimulating contemporary artistic expression in forms not possible before.

## Crafting world-class façade solutions

Aparna-Craft is a joint venture between Aparna Group, India, a leader in construction and building materials and Craft Holdings Limited, Hong Kong, a world leader in façade and exterior design and engineering. The association aims at bringing world-class façades and exteriors to life.

Ecoprime  
Manila, Philippines

## Pooling expertise

The coming together of these two large companies creates a synergistic relationship in which Aparna Enterprises Limited brings over 30 years of excellence in providing industry-leading construction and building materials solutions to its customers in India, while Craft steps in with their unmatched façade engineering, fabrication capabilities and expertise.

Aparna-Craft will offer not only a single source solution in façade, aluminum windows, doors & exterior solutions but also deliver on its on-time, on-budget project completion promise. Bringing to market a proposition that will help drive rapid innovation, bring new technologies and deliver increased customer value.

Aparna-Craft will enable architects and building owners accelerate and truly realize their business transformation objectives.

## End-to-end solutions

Aparna-Craft offers end-to-end solutions by deploying the latest technology in façades and exteriors to deliver high performance structures with energy efficiency.

Our team of specialists draws upon extensive knowledge to perform a robust analysis of the façade materials and their geometry for feasibility, serviceability and adherence to the architect's vision.

Architects and building owners in India will now have the freedom to create captivating and engaging façades and exteriors.

## Tested & proven process that works everytime

Apart from extending consulting services to architects, building owners and developers, Aparna-Craft helps solve complex design challenges, improves buildability, maximizes energy efficiency and increases security. Our ever expanding set of technological tools enable us to deliver high functioning designs that will be validated by prototype testing.

### Design & Engineering

Aparna-Craft believes that spending more time up front on design and engineering improves overall results and quality.

### From Concept to Completion

Aparna-Craft understands that a design is only as good as its buildability. We have a proven track record of successfully developing the design with the architect, while considering construction constraints.

### Project Management

Our partner has delivered some of the most iconic projects, such as Singapore Sports Hub and Cebu International Airport, and know what it takes to get the job done on-time within set budgets.

### Procurement

We have perfected a large and varied supply chain and strategic partnerships with leading material suppliers in India and across Asia.

### Fabrication & Assembly

Aparna-Craft technical & manufacturing teams and infrastructure is well experienced in delivering projects.

### Installation

Aparna-Craft relies on its experienced, directly employed installation teams and utilizes tried and trusted processes to ensure quality.

## Design & Engineering

Aparna-Craft is passionate about design and engineering beautiful, functional and buildable façades. Our expertise in a variety of systems and materials allow us to work on projects of any shape or size, ranging from traditional curtain walls to complex ETFE, fabric and composite systems as well as innovative bespoke design solutions.

### Schematic Design

PCSA

We offer clients advice on design and buildability, logistics, materials, government permissions, construction project management and sustainability.

### Design Development

Outline Specifications

Utilizing our 3D & BIM capabilities we can help to rationalize design and materials, and in the process reducing costs, and help architects and clients coordinate designs with other trades.

### Construction Documents

Technical Drawings & Specifications

We prepare and submit government submissions and construction strategies while complying with clients and specified standards.

### Construction Bidding

Technical Drawings & Building Permits

All of our fabrication drawings are completed at our design office in-house. Coupled with regular design site visits we ensure the concept becomes a reality.

### Construction Administration

Observations

All as-built drawings are provided upon project completion. The design team is also involved in any handover activities or maintenance strategy provided to clients.

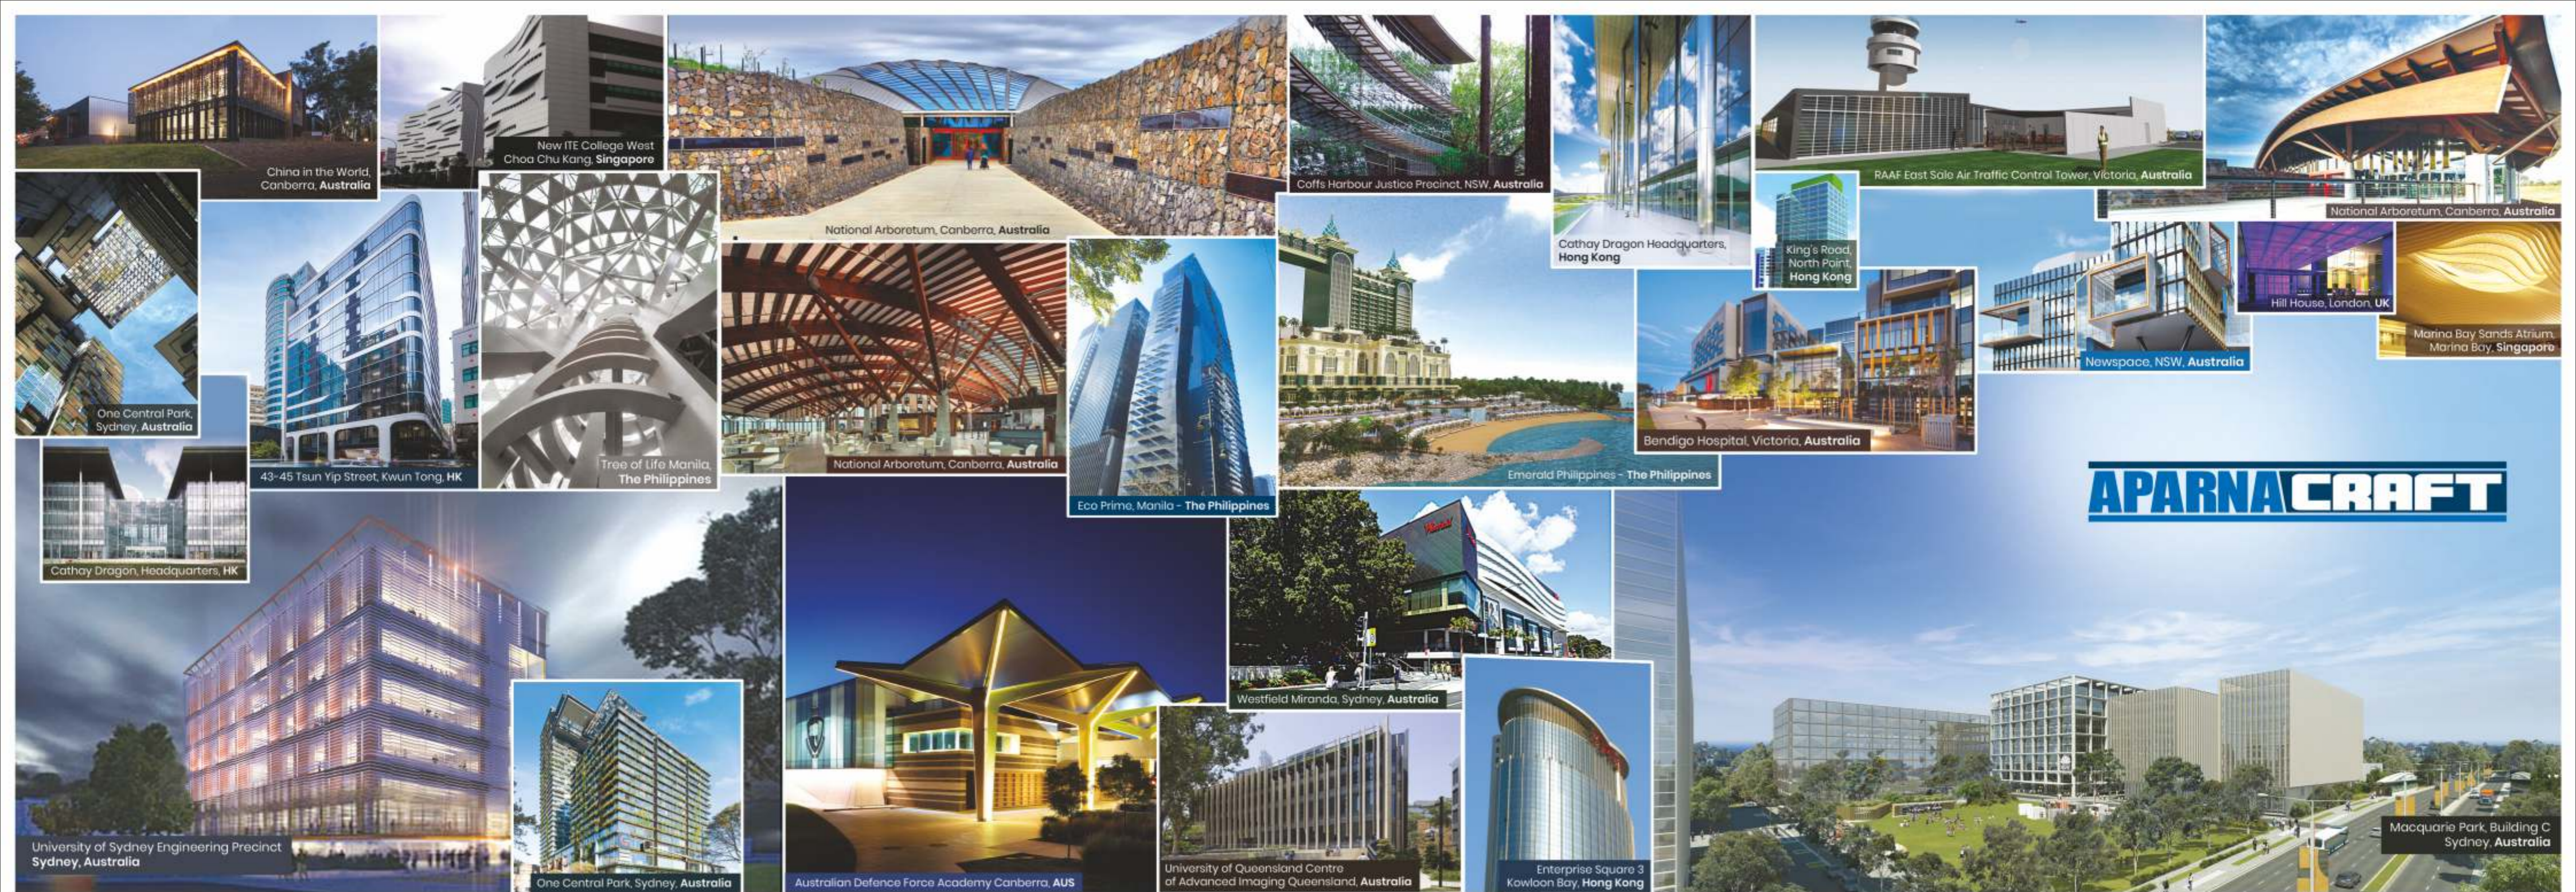

**ALTEZA**<sup>™</sup>  
ALUMINIUM WINDOW & DOOR SYSTEMS

ALTEZA aluminium doors and windows are backed by advanced research capabilities, superior European technology, path-breaking innovations that deliver an unmatched end product.

Crafted at our state-of-the-art facility equipped with advanced German machines, ALTEZA combines high precision with stringent testing parameters and highest quality standards. And is well on its way of becoming India's most trusted Aluminium Doors and Windows brand.
